HEALTH & SAFETY POLICY

R. Moore & Sons places the highest priority on providing, so far as is reasonably practicable, a safe and healthy work environment for our Workers and Visitors, to prevent work related injuries and ill health.

Our commitment is to meet or exceed applicable legal workplace health and safety (WHS) standards expected of an industry leader, eliminate hazards and reduce WHS risks, and achieve our goal of an accident free and healthy workplace – "Zero Harm".

Our WHS management system will be utilised as an integral part of RMS business operations, to provide assurance that significant hazards are identified, associated risk assessed, and effective controls implemented, monitored and maintained.

R. Moore & Sons will ensure (with best endeavours), that we comply with all legal obligations applicable to workplace health and safety.

We are committed to the continuous improvement of our work environment and safe systems of work, through ongoing monitoring and review.

We are committed to the consultation and participation of workers, and to the continual improvement of our WHS management system to enhance safety performance.
